GAIT TRAINING FOR CHILDREN

Ultraflex

ULTRA SAFE GAIT™ pediatric ADR-AFO

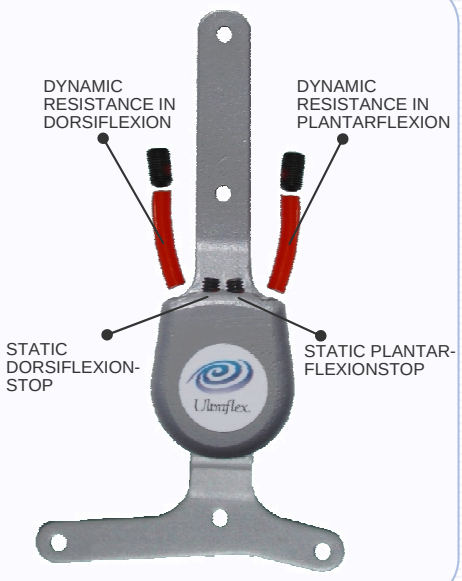
NEW

ADJUSTABLE DYNAMIC RESPONSE (ADR) IN PLANTAR- & DORSIFLEXION ...FOR CHILDREN

FOR AN OPTIMAL, NATURAL, TOTALLY CONTROLLED GAIT PATTERN

INDICATIONS

Gait deviations in CP children, e.g. showing equinus with a knee extension moment and in crouch gait



Individualizes and optimizes the gait pattern of children

FEATURES

- Adjustable hinge, in accordance with bio-mechanics of the body, with polyurethane bumpers
- Natural dampening of ground reaction forces and restoring them
- 1th, 2nd and 3th rocker possible → improves the gait pattern
- Dorsi- and plantarflexion: allows static & dynamic progressive adjustion of 40°in each direction

ADVANTAGES

- Ideal in combination with a dynamic Ultraflex-knee hinge, which allows stretching at nighttime (2 orthosis in 1)
- Made-to-measurements, allowing all possible designs
- Very comfortable and efficient during motor activities as climbing, going up- and downhill, taking stairs, playing,…
